

Playing Guide of GoFIN (beta 1.0)

October 5, 2018

Hello

Welcome to the testing phase of GoFIN, a social gaming app helps capturing buy-side color from retail stock traders.

To play the game, you simply 'Sign Up' then followed by 'Log in' with your just created password.

Once you logged in, you would automatically receive some virtual coins to play. At the bottom of the front page illustrates 4 key game functions. They are 'Movers', 'Games', 'Buzz' and 'Profile'.

'Movers' – depicts all current games with players sorted by result announcement date.

'Games' – divided into 'Stock' and 'Catchy News'.

For 'Stock', you pick an Equity Index or an Equity. Then you make a call on it from your coins. The call is your forecasted stock price on upcoming Friday closing price.

For 'Catchy News', you can either make a call on existing Catchy News that is created by other players OR you can create your own.

To create your own Catchy News, click the '+' sign on top right, write your question at 'Create Your Question', fill in 'Expected Result Date', 'Time' and 'Possible Answers'. For answer option, you need to fill in 2 or 3 options. After you created your own question, you make a call on it and decide the minimum stake. Like every other Equity game, you can write your rationale of your call where others can comment on it. Top commented rationale is showed under 'Buzz'.

For every Equity and Catchy New games, there is a cut off date for making a call and a result announcement date.

For Equity and Equity Index, the results and payout would be announced by the Apps admin. For Catchy News, the game creator will need to post the result and payout at the end of the game. If you have create a Catchy News, you would need to post the result on Result announcement date and press the 'Payout' button to execute the payout of the game. All payout is calculated from an in-house algorithm and all coins of each game would be fully distributed back among players.

'Side Bet' – You can create a side bet game and invite maximum 3 other players of the game to build up a private side bet pool for extra excitement.

' Buzz' – depicts Rationale or News

'Profile' – shows a real time stats of your virtual coins, channel for exchanging coins to real prize, summary of participated games, game settings and game sharing.
